

Measure: Welcome to Medicare Visit *aka Initial Preventive Physical Examination (IPPE)*

Population: Patients in the first 12 months of Medicare Part B

Measurement Range: First year of Medicare part B

Required Codes: CPT 99381-99387, 99391-99397 with CPT II Code: G0402, with ECG: G0403, G0404, G0405, FQHC: G0468

Exclusions: Patient in hospice, long term care and skilled nursing facilities, documentation of end stage renal disease (SRD) dialysis, renal transplant before or during the measurement period, or pregnancy during the measurement period. Must be coded for exclusion to apply.

Note: When you provide an IPPE and a significant, separately identifiable, medically necessary Evaluation and Management (E/M) service, CMS may pay for the additional service. Report the additional CPT code (99202–99205 and 99211–99215) with modifier –25. That portion of the visit must be medically necessary and reasonable to treat the patient’s illness or injury or to improve the functioning of a malformed body part.
